Experience

APX9 (Same Owners at Strategic Micro Systems**) - Parsippany, NJ**

Front-end Developer (Freelancing)

May 2024 - Current

- Rehired by the owners of Strategic to enhance and refine the co-developed application for a new venture, APX9, due to the software's serviceable performance, leading to the creation of the new company centered around it.

Strategic Micro Systems - Parsippany, NJ

Junior Developer

July 2023 - May 2024

- Co-developed a critical dashboard app leveraging multiple APIs to provide real-time, essential data to the CEO, VP, and Partners of Strategic.
- Utilized technologies such as JavaScript, React, Mantine UI, Express.js, Node.js, user authentication, Git for version control, and access/refresh tokens to build a secure and user-friendly centralized platform.
- Significantly reduced the time needed for gathering critical billing, ticket, and client information through the optimization of this developed application.

Strategic Micro Systems - Parsippany, NJ

Technician

April 2023 - July 2023

- Executed diagnostics, troubleshooting, preparations, and evaluations on tech equipment such as laptops, desktops, docks, monitors, ect.
- Maintained quality assurance and client satisfaction objectives.
- Upgraded hardware components, such as RAM and hard drives to improve system performance or meet client requirements.

Education

Rutgers, The State University of New Jersey - New Brunswick, NJ:

- Certification in Full Stack Web Development

Tech Skills

- Proficient understanding in HTML, CSS and Javascript, frameworks and libraries such as React, Tailwind, and Bootstrap, Mantine UI, ANT design, ect.
- Experience with server-side applications such as Node and Express, leveraging APIs and authentication tokens to retrieve and manipulate data to seamlessly integrate them into applications.
- Familiar with version control through the platform Github.
- Experience with team collaboration on tech projects, Wix Studio and Wordpress development, as well as hardware maintenance.
